RE: Site Inspection, American Cometco Inc., Etna Mine, S/021/009, Iron County, Utah

Date of Inspection: October 16, 2002
Time of Inspection: 5:00 p.m.
Conditions: Windy & Warm
Participants: Doug Jensen, DOGM

Purpose of Inspection:

This site inspection was the result of an August 8, 2002, Division Directive instructing the operator to either close or secure mine openings at the site. These openings were documented on a Division site inspection on July 25, 2002.

Getting to the site:

Refer to July 25, 2002 inspection memo.

Observations:

The open shaft and two sink holes that exist on the site had been secured with a fence of T-posts and field fencing. Warning signs were placed on these fenced areas warning the public of hazards at the site. Pictures of these modifications at the site were taken and are included with this memo (the date on the photos is incorrect due to a battery failure).

Conclusions and Recommendations:

The signs and fencing placed at the site satisfies the items required by the Division Directive.
